

# Goodbye Lonely

Randy Rogers Band

They say love is hard to find  
Like its something we decide  
Just found out love found you  
You walked in and caught my eye  
I felt something come alive  
Like every dream I'd ever had just came true

It's like waking up after you've been sleeping  
Finally found you something you believe in  
Live the rest of my life for you only  
It's no more lonely goodbye  
It's goodbye lonely

You've got my soul singing songs  
It's been quiet now for so long  
My heart is beating just like a drum  
And for so many years I thought you'd never come

It's like waking up after you've been sleeping  
Finally found you something you believe in  
Live the rest of my life for you only  
It's no more lonely goodbye  
It's goodbye lonely

All of a sudden the sun is shining  
All of the stars decided to align and  
There you were it looks like love had perfect timing

Its like waking up after you've been sleeping  
Finally found you something you believe in  
Live the rest of my life for you only  
It's no more tears in my eyes  
No more lonely goodbyes  
Its goodbye Lonely
