

## Excuse Me

Raphael Saadiq

How about the possibility of you and I  
Lady can we try  
Lady say you're with it  
If you're not with it, get it 'scuse me

Can't make you stay  
If you want to go  
Sugar I can't make you love me  
If you're heart says no  
There's one thing I'm certain of  
And I know it's true  
Can't nobody does it like I do like I do

Hey excuse me please  
You sure look good to me  
With your straight hair up braids  
Kinda got my momma's waves (kinda got my momma's waves)  
How about the possibility of you and I  
Lady can we try  
Lady say you're with it  
If you're not with it, get it 'scuse me

The first time I saw your thighs  
That's when I realized  
My heart - it skipped a beat  
I can't seem to make you see  
I tried everything in my book  
I'm laughing cause you won't even look  
I gotta stop wasting my time so excuse me please

Can't make you stay  
If you wanna go  
Sugar I can't make you love me  
If you're heart says no  
There's one thing I'm certain of  
And I know it's true  
Can't nobody does it like I do like I do

I'm a try this one more time  
You look like virgin eyes  
This one here might be true  
And here's a few fools for you  
I - I wanna be married but free  
I gotta let the drama miss me  
Could this apple fit on your tree  
If not excuse me please

Hey excuse me please  
You sure look good to me  
With your straight hair up braids  
Kinda got my momma's waves (kinda got my momma's waves)  
How about the possibility of you and I  
Lady can we try  
Lady say you're with it  
If you're not with it, get it 'scuse me

Can't make you stay

If you wanna go  
Sugar I can't make you love me  
If you're heart says no  
There's one thing I'm certain of  
And I know it's true  
Can't nobody does it like I do like I do

Can't nobody love you babe  
Can't nobody touch you babe  
Like I do  
Yeah yeah yeah yeah  
It'll be all right  
It'll be all right  
It'll be okay  
It'll be okay  
Love's goin' be all right  
This ain't nuthin but a slow song  
Oh yeah all right... gospeldelic  
It'll be all good
