## **Not Like The Other Girls**

## The Rasmus

- No more blame I am destined to keep you sane Gotta rescue the flame Gotta rescue the flame in your heart
- 2. No more blood, I will be there for you my love I will stand by your side The world has forsaken my girl
- R: I should have seen it would be this way
  I should have known from the start what she's up to
  When you've loved and you've lost someone
  You know what it feels like to lose
- \*: She's fading away
  Away from this world
  Drifting like a feather
  She's not like the other girls
  She lives in the clouds
  She talks to the birds
  Hopeless little one
  She's not like the other girls I know
- 3. No more shame, she has felt too much pain, in her life In her mind she's repeating the words All the love you put out will retun to you
- R: I should have seen it would be this way
  I should have known from the start what she's up to
  When you've loved and you've lost someone close to
  You know what it feels like to lose
