

# Somewhere Along the Road

**Raunchy**

Hell Yeah we're riding big cars with big cigars today  
We're thunder, storm and everything that's here to stay  
Say what you want  
Tonight the sky is on fire  
Say what you want, tonight we are the fire!

I died alone with you somewhere along the road  
I've tried so very hard watching you, watching you fade

Hell yeah my dead boys are in the mood for a fight  
Like zombies they are, they smell blood, what a wonderful sight  
Say what you want  
Tonight the sky is on fire  
Say what you need  
Tonight we are the fire!

I died alone with you somewhere along the road  
I've tried so very hard watching you, watching you fade

Just take your time and come on over  
The show is about to begin  
When the shit hits the fan just before sundown  
That's when the girls are dressed for sin  
That's what i saw in Copenhagen  
That's what i saw

I died alone with you somewhere along the road  
I've tried so very hard watching you, watching you fade

That's what i saw in Copenhagen  
In London. In New York City. In Amsterdam
