

Life is in the moment  
And life is incoherent  
Life is a thing that you chose to have inherent  
You came here for a reason  
But you cannot remember it  
And you might be frustrated  
You might be confused and hyperventilated  
Worried about the future  
Pull up to the station  
Climb up on the crystal express

As we, as we run  
Days and stormy nights  
Pray we'll find a way to the sun  
Cause you give me life  
Give it all before it's gone  
And I'll give you life  
Give you everything and more  
And you give me life  
Is it all we need and want  
And I'll give you life  
And we all, we all, we all need light

Follow me my brother  
Talk to me my sister  
We can go wherever  
And we can live forever  
As we find illumination  
Right up on the crystal express  
And we can face some problems  
Trials and tribulations  
Diamonds go through heat and constant pressure for creation  
Be at your true nirvana  
You can ride the crystal express

As we, as we run  
Days and stormy nights  
Pray we'll find a way to the sun  
Cause you give me life  
Give it all before it's gone  
And I'll give you life  
Give you everything and more  
And you give me life  
Is it all we need and want  
And I'll give you life  
And we all, we all, we all need light
