

New Religion

Raven

Take a moment, look around
Tell me what you see
No colour, black and white
Anger and misery

Standing on the edge of a nightmare
There's no future there is just today

There's a new religion
You'd better save yourself
A new religion
A new religion

You can slash and burn
But the worm will turn
Everything you want more
The wolf is at your door

Standing on the edge of disaster
There's no future
There is just today

There's a new religion
You'd better save yourself
A new religion
A new religion
A new religion
A new religion

Standing on the edge of a nightmare
There's no future there is just today
On the inside getting nowhere
Timebomb it will explode

There's a new religion
You'd better save yourself
A new religion
A new religion
A new religion
A new religion
