

Watcher in the sky

Ravenheart

Watcher of darkness
Guardian of light
Keeping the secret
Stand on your side

Let your mind open
Look up to the sky
Believe what you feel
Trust in your mind

Open up your eyes and see
Guardians of eternity
So we raise our swords and knives
To the watcher in the sky

With the fire we ride
Every day every night
Hope for freedom on earth
Hope that no one no one will hurt

Step right on this endless darkness
Never give away your soul
Don't you turn away in blindness
Don't you ever lose control

With the fire we ride
Every day every night
Hope for freedom on earth
Hope that no one no one will hurt

Controlling all steps
Controlling all moves
The guardian of light
We won't ever lose

Deep in the universe
Your mind will be free
They will protect us
We have the key

Open up your eyes and see
Guardians of eternity
So we raise our swords and knives
To the watcher in the sky

With the fire we ride
Every day every night
Hope for freedom on earth
Hope that no one no one will hurt

Step right on this endless darkness
Never give away your soul
Don't you turn away in blindness
Don't you ever lose control

With the fire we ride
Every day every night

Hope for freedom on earth
Hope that no one no one will hurt
