

Black & white

Rawside

See your friends fighting against their health
see mankind fighting against itself
see nations marching into wars
see children dying under a car
see the bloods fighting against the crips
see the whites fighting against the blacks
see religions fighting against the sin
but who realize, no-one wins

See the blacks
See the whites
See your friends
See them die

Believe your lie
let the victim die
support your lie
like them you will die
