

Burn down

Rawside

We live in a wasted world, destruction ever stay
The consequence of the mistakes, now the poor pay
People were discriminated, people were oppressed
And the whole governments, a lack of success

Look around big world, misery everywhere
War in many countries, radiation in the air
People were tortured, people will be killed
But the fucking politics, by the way so blind!

Burn down - The government
Burn down - The nationalflaggs

We want break the rules
They have forced upon us
Violence, hate, everlasting fight
Is our view of right

You say I am sick
But I believe'n myself
Hey, I don't need your foolish words
Cause in my ears they hurt

Shout it out
Stand up crowd

We want break the rules
They have forced upon us
Violence, hate, everlasting fight
Is our view of right

You say I am sick
But I believe'n myself
Hey, I don't need your foolish words
Cause in my ears they hurt

Burn down - The government
Burn down - The nationalflaggs
