

See you die

Rawside

That's the new, the new world war
that's the reason you get out of my way
for global world, for global lies
we are the only, the only ones who pay

The unemployed get more and more
poor people all over the world
the elite, grab the cash
to push up, the hierarchy of their land
war in their land

What we see is the truth,
and we see you die
what we hear is your voice,
and we hear you cry you got no mercy for me
I got no mercy for you
see you die

The new world order is no future for me
so we resist the system and your laws
you stupid bastards, we beware of you
Don't push me around
And fuck you, too
Don't kill the earth, don't kill my life
we shout it out, we won't be quiet
change your mind and change your life
it's time to see the suffering, you can stop

you can stop now!
