

## After Effects (From Loving You)

Ray Price

Nights are longer when you're blue and all alone  
Seems eternity will past before the dawn  
I tried everything but I can't seem to lose  
All these after affects from loving you  
Now I may tell myself I'll find an easy way to escape this misery from day to day  
But my heart knows good and well it's only you  
Who can ease my troubled mind and arise the pain they find  
From the after affects from loving you

Now I may tell myself...
