

Love Someone

Rea Garvey

Great minds think alike
But few can stay the same
And though I'm gone
I'm never out of range
The heart grows fonder
The heart grows stronger
For what it knows it needs

We stand beneath the same stars
We're breathing from the same heart
I'm trying to show how I feel
We stand beneath the same stars
We're breathing from the same heart
I'm trying to show how I feel

I got the feeling that I love someone
I got the feeling that I love someone
I got the feeling that I love someone
And the feeling is real

Life's un-chartered course
No regrets and no remorse
See everything as is

Come the waves come thunder
Should world go under
With everything we need

We stand beneath the same stars
We're breathing from the same heart
I'm trying to show how I feel

I got the feeling that I love someone
I got the feeling that I love someone
I got the feeling that I love someone
And the feeling is real

We stand beneath the same stars
We're breathing from the same heart
I'm trying to show how I feel

I got the feeling that I love someone
I got the feeling that I love someone
I got the feeling that I love someone
And the feeling is real
I got the feeling that I love someone
I got the feeling that I love someone
I got the feeling that I love someone
And the feeling is real

Great minds think alike
But few can stay the same
