Just a Little Love

Reba McEntire

When our check bounces at the store And the whole world seems at war You bring me peace of mind once more With just a little love

When the boss says I'm ten minutes late And the stack of bills just won't wait Oh, you take the worries away With just a little love

R: Just a little love And affection You bring a touch of perfection To a world that's sometimes crazy And so mixed up Just a little love You have changed me You make me see why the good Lord made me And you can do miracles With just a little love

When our old car won't run And all my dreams come undone You'll make it right won't ya hun With just a little love

When it seems like all the truths are gone When I'm trying so hard to hold on You make it easy to be strong With just a little love

R:
