Shoulder To Shoulder

Rebecca Ferguson

Cause I feel safe when you're near me And I can hold you completely Although you constantly hurt me And we fight And we cry And we tell the same lies about love And we cling to each other shoulder to shoulder against the world So I'm gonna drag you down Whilst you drag me down And I'm gonna shout at you Whilst you shout at me until we realize that real love is free free And I get a kick when you worry That you are just no good for me And I feel weak watching you plead And we fight And we crv And we tell the same lies about love And we cling to each other shoulder to shoulder against this world So I'm gonna drag you down Whilst you drag me down And I'm gonna shout at you Whilst you shout at me until we realize that real love is free free Don't be my downfall Don't be my downfall Don't be my downfall Don't be my downfall Let's leave it alone We can work it out Find our way Forget the past Cause I love you and you love me So let's crawl free So I'm not gonna pull you down Whilst you pull me down And I'm not gonna shout at you Whilst you shout at me because I've realized that real love is free Free Free Free
