Take Me Out

Red House Painters

That sound coming from those holes A voice that soars And takes my wounds with it To levels unknown

If only you could take me out Instead of back in To a relationship I don't understand

If only you could take me out Instead of back in To myself that's dying within

Your soul pours out of those holes Music of this crazy time When your car crashed Did your ghost find peace and together entwine?

If only you could take me out Instead of back in To a relationship I don't understand

If only you could take me out Instead of back in To myself that's dying within

If only you could take me out Instead of back in To a relationship I don't understand
