

So Many Days

Red Line Chemistry

Lay right down
Dream about the life we have found
It's only just begun
And we know we bring to light
What most can never find
And finally, we'll be alive
Still we ask ourselves
Is it worth the trip through hell

So many days
Come and go to waste
While I wait for you
I see you here
And everywhere I go
While I wait for you
And ya know that I'll wait for you

Take my words
It's all we get for now
But rest assured
We've only just begun
And the seasons all will change
But we'll remain the same
And finally, we'll be alive
Then we'll know damn well
It was worth the trip through hell

So many days
Come and go to waste
While I wait for you I see you here
And everywhere I go
While I wait for you
And ya know that I'll wait for you
And ya know that I'll wait for you
