

# Change Colours

Reece Mastin

Breathe in the air  
I know it's hard to see past the urgency  
the emergency  
don't you let them rush you into something that you know is far  
away from you

I need the dark  
my bloodshot eyes blur at my insanity  
I have clarity  
When they force my head to chain me up and leave me out to dry

Bright lights change colours in the night  
take my picture, change colours, colours  
reach out to me, change the way I feel and make me come around  
I'm not waiting for the lights to change,  
change colours, colours, change colours

I found a place  
a place in my brain where I can be anything,  
I want everything  
I have the power to control the myth that we all call our destiny  
I won't rest in peace

Bright lights change the colours in the night  
take my picture, change colours, colours  
reach out to me, change the way I feel and make me come around  
I'm not waiting for the lights to change,  
change colours, colours, (change colours)

Bright lights change colours in the night  
take my picture, change colours, colours  
reach out to me, change the way I feel and make me come around  
I'm not waiting for the lights to change,  
change colours, colours

Bright lights change colours in the night  
take my picture, change colours, colours  
reach out to me, change the way I feel and make me come around  
I'm not waiting for the lights to change,  
change colours, colours, change colours
