

So alone, I'm going to sleep tonight, again  
I never want to wake up  
You were so cruel to me, I thought I loved you  
But I was in love with devil's breed  
It's raping me, taking me, under the ice cold ground

I'm on my way to the stars,  
You can't stop me even if you'd try

You can play your sick game with someone else  
Who'll swallow your lies and stay  
What's wrong with you?  
You can take what you want but you better not take it  
from me  
I'll laugh at you, spit on you, no matter what you say

I'm on my way to the stars,  
You can't stop me even if you'd try  
(to take away) my heart that's now longing for real love,  
I will find someone who heals my broken heart  
( I'm on my way to the stars)
