

## Pump the Brakes

Refused

genocide on genocide - destroyed knowledge crushed pride  
lost culture to civilization - reduced abused beyond dignity  
contemplation exploitation - ring the bell of information  
blocked the truth convincing, controlling - held us down unthink-  
ing, unknowing  
oppressed so many for so long - we've ignored the facts, and moved  
along  
we gotta pump the brakes  
wasting resources, face some facts and detect the causes - cause  
our progression equals  
destruction, people getting killed by government corruption  
cause making most of the land, that's the plan, you gotta under-  
stand  
that 50 years down the line, there won't be no time, the time is  
now.  
drained so much for so long - we've ignored the costs and moved  
along  
time to pump the brakes  
gotta pump the brakes, pump pump the brakes...
