

Pump the Brakes

Refused

genocide on genocide - destroyed knowledge crushed pride
lost culture to civilization - reduced abused beyond dignity
contemplation exploitation - ring the bell of information
blocked the truth convincing, controlling - held us down unthink-
ing, unknowing
oppressed so many for so long - we've ignored the facts, and moved
along
we gotta pump the brakes
wasting resources, face some facts and detect the causes - cause
our progression equals
destruction, people getting killed by government corruption
cause making most of the land, that's the plan, you gotta understand
that 50 years down the line, there won't be no time, the time is
now.
drained so much for so long - we've ignored the costs and moved
along
time to pump the brakes
gotta pump the brakes, pump pump the brakes...
