

Belong With You

Remedy Drive

All alone in a crowded room
No place for me to fit into
Empty face with a painted smile
I don't know why

Still the same even if I try
I'm in the middle but I'm still outside
Can someone tell me where I went wrong
I don't understand at all

But when you find me in my busy streets of emptiness
Remind me I'm not ever on my own

I don't know how you love me like you do
It's so good to belong with you
In all the places I'm a stranger to
It's so good to belong with you

Is it really worth it in the end
To try time and time again
Looking for what has always been right there
