## **Incisions**

## **Remembering Never**

She paints a pretty picture we can all adore She's covered in razor lines and dynamite You've shown me how to dissect your beating heart And just how far these fake smiles can go

So glamorous (shattered like glass)
Fingers shoved to the back of your throat
For a little sex appeal, heaving
Don't forget to call the ambulance when your body hits the floor

So fucking perfect Your execution will be televised You threw it all away for a piece of the action Vanity assassin

With cuts like a diamond and wrapped in plastic The whole world is crushing on you The whole world is watching you die Enjoy living on top of the world

When you die knowing you lived your life on your knees Die knowing you lived your life on your knees
