God is near

Rend Collective Experiment

No one really knows What it is to be alone Since You've never left our side

Omnipresence means That You're never far away You're always within reach Always within reach

Hallelujah God is near Hallelujah Christ is close Hallelujah God is near Hallelujah

We've been oceans apart But You'd part oceans to be with me Nothing can keep You away Nothing can keep You away

You're living in me now You built Your home inside my soul And You're never moving out No You're never moving out

You're closer than a whisper Close enough to hear my heart beat You're closer than a kiss Close enough to raise my heart beat
