

They-Say Vision

Res

I wanna try that pill that people take
Make you believe all the things that people say
Sick of shuckin' 'round with a screwed up face
With my heels dug in trying to leave a trace
Now come on put me down somehow
How you lose your faith
(just take my hand and lead me where you wanna)

[Chorus:]

Pay no more mind to what you think you've seen
It's as they do only
Say what they say
'Cause there's only one way
They-Say Vision
It takes you back to just where you want
Like when you ain't know no way

Industry's down think I've died and I've flown away
So so long to them thieves who came and took all the things to
say
I play the joker sometimes but then those moments slide back my
way
'Cause for real I'd give my soul away
Give it all away
(so take my hand and lead me where you wanna)

[Chorus]

I know where they all go find someplace
Where they don't mind loafing about the waste

They-Say Vision takes you back to where no conscience
Free from how you really see

And if you think that you know
Take the back road
They got you where they want
They got you
