Calm Before The Storm

Restless Heart

Well you blow through here Like you own this town Like a hurricane You never touch down I hear the sound of the thunder I start to tremble slow I know it won't be long until the whole thing blows [CHORUS:] Somebody's gonna get hurt Somebody's gonna go down Just when you think it's over It's gonna come back around You're just headed for trouble Don't say you haven't been warned You'd better get out on the double It's just the calm before the storm You've got nobody You can call your own Everything you touch Just turns to stone Someday you're gonna wake up And it'll all be gone And you'll realize everything you did was wrong

[REPEAT CHORUS]
