

Friendship Forever

Retard-O-Bot

My dreams come in every shape
And when I close my eyes
I can't help what I come to realize
That everything starts making sense

If I have something I'm trying to forget
Regret won't let me let it go
I can't shake it until I awake
Until I awake

Cut loose from these rules
That only hold me back and
Retract what I thought was clear
Now that I can't live this way

You're gone now
And nobody cares
And nobody cares

Year in year out, take that smile
I stuck around

This is what I need

My dreams come in every shape
And when I close my eyes
I can't help what I come to realize
That everything starts making sense

If I have something I'm trying to forget
Regret won't let me let it go
