

# Whatever

Rex Goudie

Youve been lied to a million times before  
I know that you tried to move on be strong hold on  
Stealth in the distance like youre a thousand miles away  
Like no one ever listens but trust me this time is gonna change

I tell you i want you a thousand times every day  
My love wont fade

Whatever it is that want  
Whatever it is that you say  
I'll do my best i swear i'm gonna make it that way  
Whatever it is that you need go ahead and take it from me  
I'll do my best until i make you believe

Any risk that i take will be worth it to get through to you  
Cause youre the one i search for  
And the one thing that i would never lose

I tell you i want you a thousand times every day  
My love wont fade

Whatever it is that want  
Whatever it is that you say  
I'll do my best i swear i'm gonna make it that way  
Whatever it is that you need go ahead and take it from me  
From me!

I turn off the stars  
Turn off the sun to carry you away  
Drain the ocean just to be with you  
I paint the sky the colour of your eyes so you watch over me  
Then youd see that i'd do anything

Whatever it is that want  
Whatever it is that you say  
I'll do my best i swear i'm gonna make it that way  
Whatever it is that you need go ahead and take it from me  
From me!

Whatever it is that want  
Whatever it is that you say  
I'll do my best i swear i'm gonna make it that way  
Whatever it is that you need go ahead and take it from me  
I'll do my best until i make you believe  
I'll make you believe
