

# You Got To Me

Rex Goudie

All my life I've been looking for a rainbow  
I was starting to think that I was colour blind  
You walked in the room and theres my pot of gold  
And I can just leave everything behind  
All this time I've been running round in circles  
I was starting to think that I would lose my mind  
but you came along and pulled me from the danger  
Its a merry go round and I don't wanna get off this ride.

You got to me without a warning  
You got to me when I had nowhere to go  
Now I see the colour in the night  
In black and white  
I can't remember how I used to be  
And I can't get outta bed but I can dream  
You got to me  
You got to me

All good things must come to those who wait for  
For every good reason theres gotta be a very good rhyme  
All my life I've been trying to find an answer  
And now I know I have to take my time

You got to me without a warning  
You got to me when I had nowhere to go  
Now I see the colour in the night  
In black and white  
I can't remember how I used to be  
And I can't get outta bed but I can dream  
You got to me  
Maybe it was just the way you held me  
When my world was hanging by a string  
Maybe it was just the way you knew me  
When I didn't know myself  
And everything felt  
Like Hell

You got to me without a warning  
You got to me when I had nowhere to go  
Now I see the colour in the night  
In black and white  
I can't remember how I used to be  
You got to me without a warning  
You got to me when I had nowhere to go  
Now I see the colour in the night  
In black and white  
I can't remember how I used to be  
And I can't get outta bed but I can dream
