

Been There, Done That

Rhino Bucket

It was close to midnight, when you came on to my friend
You said you used to love me, but all bad things must end
Time to turn the light on, time to get the hell out
Don't do me no favors, just shut you're f**king mouth
Been there, done that baby, don't care who believes
Been there, done that honey, it's alright if you leave
Ain't got no score to settle, don't care about right or wrong
You can keep on talking, but I've been here to long
Time to get on the highway, time to go for a ride
So many times I've waited, but now you're out of time
Been there, done that baby, don't care who believes
Been there, done that honey, it's alright if you leave
Been there, done that baby, I left you down on your knees
Been there, done that honey, it's alright if you leave
I woke up in the morning, I was confused, twisted
Walking through the club man, I was juiced, double fisted
Ain't gonna try and toe no line, just wave goodbye
It was close to midnight, when you came on to my friend
You said you used to love me, but all bad things must end
Been there, done that baby, don't care who believes
Been there, done that honey, it's alright if you leave
Been there, done that baby, I left you down on your knees
Been there, done that honey, it's alright if you leave
I've been there (been there, done that baby)
Oh yeah (been there, done that honey)
I've been there (been there, done that baby)
