

# Deep Space

Rialto

What if there's another world  
Circling a distant star  
And on this planet lives a girl  
Won't you tell me where you are?

I'm in deep space  
I think I'm fallin'  
And I feel like, I'm a million miles from home

I'm in deep space  
Can you hear me callin'?  
'Cos I'm searchin' for the light to save my soul  
Is there anybody there that can pull me out of this black hole?  
(Is there anybody there that can pull me out of this black hole?)

From the past right to the present  
I've been waiting for a sign  
For an angel sent from heaven  
A rocket in this starless sky

I'm in deep space  
I think I'm fallin'  
And I feel like, I'm a million miles from home

I'm in deep space  
Can you hear me callin'?  
'Cos I'm searchin' for the light to save my soul  
Is there anybody there that can pull me out of this black hole?

Well, I built myself a capsule  
And I've drifted days and nights  
When I look into the darkness  
There's a vacuum in my life

I'm in deep space,  
I think I'm fallin'  
And I feel like I'm a million miles from home

I'm in deep space  
Can you hear me callin'?  
'Cos I'm searchin' for the light to save my soul  
Is there anybody there that can pull me out of this deep space?

I'm in deep space, I'm in deep space  
Is there anybody there that can pull me out of this deep space?

I'm in deep space, I'm in deep space  
Is there anybody there that can pull me out of this deep space?
