

Another Me

Rich Homie Quan

It can't be no other me, establish?
It can't be no another me
It can't be no another me
I smoke good and nigger pound good
Can't help how I sound but it can't be no another me
I'm the future, stop comparing us
It can't be no another me
There won't be another me
Ok now hear me, not equal
I gash all these people
For the reason
There won't ever be another me

Gotta know these faces who you gonna get for graduation
Want you to know I'm in, want you to know I'm serious
Want you to know I'm killing
If you want it you can get it
I ain't in my feeling but I want you to feel this
I ain't tryin to be the realest but the shit I talk
To the critics try to stack it to the ceiling
These are real niggers on some millions
Girl it can't be no other me
I ain't lying but on my time boy don't fuck with me
Got noI got no pain, for how them thoughts come out of me
And if fuck what you thought around me

It can't be no another me
I smoke good and nigger pound good
Can't help how I sound but it can't be no another me
I'm the future, stop comparing us
It can't be no another me
There won't be another me
Ok now hear me, not equal
I gash all these people
For the reason
There won't ever be another me

I know all my exes still in love with me
I told my baby mama there will never be another me
I know they love to see me down babe
I'm laughing at these niggers clowning
You know we reef forever, my crewed got reef forever
Invite my bitches over and have a get together
Don't need no shrink but I gotta get my shit together
Bitch on mywe're not here together
It can't be no another me
My heart blocked and my heart locked
Can't use no other king
I ain't gotta tell you where to go cause you know where to be
She phone me and said

It can't be no another me
I smoke good and nigger pound good
Can't help how I sound but it can't be no another me
I'm the future, stop comparing us
It can't be no another me
There won't be another me

Ok now hear me, not equal
I gash all these people
For the reason
There won't ever be another me
