## **Science of Silence**

**Richard Ashcroft** 

We are on a rock, spinning silently But I'm safe when you're here with me These questions I'm asking, they've been haunting me I need some security, can't you see? Her love was like a fountain rushing and pouring down The darkness is putting out the light in me She's a well to be dug, she's a university A cosmic library - wait and see

We are on a rock, spinning silently Won't you get close to me We are on a rock, spinning in infinity Won't you get close to me

Is it my genes that have made me? Is it the things I took, is it the things I said Does karma rule? Well if there's a God well can you hear me now? I am crying out, hoping you know And in my baby's arms I need no faith I need no words to define myself And when I'm holding you, light rushing through I wanna make it now, safe and straight

We are on a rock, spinning silently Baby get a hold of me We are on a rock, spinning in infinity Baby consoling me

Oh I don't know when the fear's going to end I don't know if my prayers are received - the ones I send (We are on a rock, spinning silently) I can't live in pain and fear (We are on a rock, spinning in infinity) Oh I see so much joy and it makes me scared (We are on a rock, spinning silently) Oh I don't know if my prayers are received, until the end (We are on a rock, spinning in infinity) Oh I guess it ain't offet for you to pray for peace Oh baby I don't know where I'm going All I know is that I need you as a friend
