

# Fire Engine

Richard Lloyd

Let me take you to the empty place in my fire engine  
Let me take you through the empty space in my fire engine  
If it gets too hot you know we'll cool it down with a rubber hose in my  
fire fire fire engine  
We'll be rolling through this hurricane in my fire engine  
Pull a hook and ladder right through your brain in my fire engine  
They keep saying I'm so hard to please, but tell me something  
now I will get down on my knees in my fire fire fire engine  
Let me take you through the empty place in my fire engine  
Let me take you down a total disgrace in my fire engine  
We'll go rolling down and look at all the flames  
Haul it back just to see what will remain in my fire fire fire engine
