

Everything I Want

Richard Marx

I wasn't living
Till the day you came around
And all of my defenses came tumbling down
You turn up the quiet
You make my troubles cease
And deep inside your eyes there's only peace

And everything I want
Is right here in my arms
All I have been looking for, I can see
And everything I need
Has been with me all along
Just like an angel watching over me

I never imagined
I could ever feel like this
And I know that here on Earth, Heaven does exist
The battles I'm fighting
Disappear without a trace
If I just close my eyes and picture your face

And everything I want
Is right here in my arms
All I have been looking for, I can see
And everything I need
Has been with me all along
Just like an angel watching over me

Someone must have prayed
Someone must have heard
I know that miracles still happen in this world

(Everything I want)

And everything I need
Has been with me all along
Just like an angel watching over me
Just like an angel watching over me
Over me, over me
