

## From the Inside

Richard Marx

I'm searching for the cure  
An antidote to heal me  
Desperately I try to chase  
Away the lines that haunt my face  
But the truth wins every time

The lights are coming on  
All the glitz is gone  
I'm staring at the view from the inside

So this is the real me  
I don't like what I see  
Staring at the view from the inside

So welcome to my world  
The ultimate illusion  
I've hidden in words and melody  
Now they're comin' back on me  
Yeah, the hand they bite is mine

The lights are coming on  
All the glitz is gone  
I'm staring at the view from the inside

So this is the real me  
I don't like what I see  
Staring at the view from the inside

Tryin' hard to just get by  
But blessedly I'm failing

The lights are clearly on  
All the glitz is gone  
I'm staring at the view from the inside  
So this is the real me  
Do you like what you see  
Staring at the view from the inside
