Turn Off the Night

Richard Marx

I think about you every time
I take a breath and then
I let it go
I remember when you were mine
But you were just a dream
I used to hold

Now if there's no sleep
Cause every star
Is lighting up,
Following these memories haunting
Knowing there's so much of you am still wanting
Here with me
I pray for the dark
Cause if it comes
Maybe some how I'll be alright
If I could just turn out the night

I think about the way you used to say my name
And how it made me feel everything
Now am looking for anyway
To make it through one thing
The morning

But there's no sleep
Cause every star
Is lighting up,
Following these memories haunting
Knowing there's so much of you am still wanting
Here with me
I pray for the dark
Cause if it comes
Maybe some how I'll be alright
If I could just turn out the night

If only I
Could just close my eyes
I'll finally be over you

Now if there's no sleep
Cause every star
Is lighting up,
Following these memories haunting
Knowing there's so much of you am still wanting
Here with me
I pray for the dark
Cause if it comes
Maybe some how I'll be alright
If I could just turn out the night
