

Whole World to Save

Richard Marx

Nowhere to hide, you can escape the fun
No matter where you run
All that is gone with the times
And time will tell on you
If you don't carry through
You've got your soul on the line

Long as you know
Wich side the sun rises on everyone
Wherever you go you'll understand
Holding the light in the center of your hand,
There's a

Whole world to save
There's a whole world
You can start any place,
There's a
Whole world to save, whole world
Not any reason to wait

You're alone, you and everything with a face
Why'd they call it human race?
All in a world of our own
I think it's gone fare enough,
I say we called their bluff
Somebody's got to be strong
If you get one wild life in the night,
oh, you'd better get it right
If it's the only life you get
What is the worth
If it's you and nothing left
There's a

Whole world to save
There's a whole world
You can start any place,
There's a
Whole world to save, whole world
Not any reason to wait

Making a difference,
Seeing what nobody sees
I won't wait for deliverance
'Couse I know it's waiting for me

Long as you know
Wich side the sun rises on everyone
Wherever you go you'll understand
Holding the light in the center of your hand,
There's a

Whole world to save
There's a whole world
You can start any place,
There's a
Whole world to save, whole world
Not any reason to wait
