## Putting Out The Vibration (And Hoping It Comes Home)

**Richie Havens** 

Brighter days ahead Step out from the shade Brighter days ahead See what you have made Of yourselves Of your lives

Brighter days ahead In these present eyes Reach out from the haze In these present eyes See what you have made Of these days Full of hate Full of strife

Brighter days ahead See the morning from your knees Peace at noontime saves the sun See the evening if you please Love and peace and life are one

Brighter days ahead Let all men realize Brighter days ahead That this truth they prize In their eyes In their eyes Brighter days ahead
