

Don't you know I'm waiting for you baby?  
Don't you know I'm waiting for a sign?  
Because there's a light to guide us through the night  
You might think I'm crazy  
But I would die for you

Because I love you with all of my heart  
Baby, I always will  
Don't forget it  
From the start, you and I were meant to be together

A light is shining  
A light is shining for me and you  
And I know, the light is from the blue star of love

Memories electrify my senses  
Of how it used to be before you left us  
Because there's a light to guide us through the night,  
yeah  
You might think I'm crazy  
But I would die for you

Because I love you with all of my heart  
Baby, I always will  
Don't forget it  
From the start, you and I were meant to be together

A light is shining  
A light is shining for me and you  
And I know, the light is from the blue star of love

A light is shining  
A light is shining for me and you  
And I know, the light is from the blue star of love
