## **This Must Be Heaven**

When I was much younger It used to happen every night I had a dream about a city dressed in lights And there were friends of mine I saw them time after time But I never knew their names And darling I swear I saw you there I know it sounds insane

Sweet dreams of a child forgotten so easy I needed your smile to bring it all back to me I see all of my life as the road that brought me here Must be something went right I just know when you're near

This must be heaven Have I found it what I've been looking for This must be heaven Have I finally stumbled through the door

How could I have doubted I guess I must have lost my place You turned on the light And I saw my life Reflected in your face

Sweet dreams of a child forgotten so easy oh yeah I needed your smile to bring it all back to me I see all of my life as the road that brought me here Must be something went right I just know when you're near

This must be heaven Have I found it what I've been looking for This must be heaven Have I finally stumbled through the door

And I always knew that there was something more

Come closer to me now You fill me up I'm overflowing Come closer to me now Come hold me tight and don't let go

This must be heaven Have I found it what I've been looking for This must be heaven Have I finally stumbled through the door

You fill me up girl You fill me up and I'm overflowing

This must be heaven Have I found what I've been living for This must be heaven Have I finally stumbled through the door

## **Rick Astley**

This must be heaven Have I found what I've been looking for This must be heaven And I always knew that there were something more
