

A Sign of Life

Rick Springfield

A footprint in an alien nation
One step for all mankind
You can't wait for that invitation
To probe around my little mind
Looking for a face in a galaxy of space
If you're really, really there we kind of need you down here

Oh why don't you come and show yourself to me
In all this universe I know you're not that green
Are you out there, can you sympathize with all us human beings?
And show me a sign of life, gimme a sign of life
Just one sign of life, that's what I need

Beam down through the radiation
A cold earth is where you'll find
That this world is a destination
A close encounter with another kind
Head to home base on a rocket ship of faith
If you're really, really near we kind of need you right here

Oh why don't you come and show yourself to me
In all this universe I know you're not that green
Are you out there, can you sympathize with all us human beings?
And show me a sign of life, gimme a sign of life
Just one sign of life, that's what I need

Are you real or make believe
Why won't you let me see

Oh why don't you come and live your life with me
In all this universe I know you're not that green
Are you out there, can you sympathize with all us human beings?
Show me a sign of life (come show me),
Sign of life (come show me),
Sign of life (come show me)
Sign of life (come show me)
