

The Lost Cycle

Rick Wakeman

The spaceman came from time unknown
His knowledge way ahead of man
To seek the cycle starting here
The evolution plan
Each day he watched the world evolve
Eternal life for him to prove
Watching man grow powerful
Destroying life with every move
The spaceman's world a burning mass
Destroyed by his own kind
A sole survivor lost in space
A growing world must find
He saw the birth of hate and war
Of death before our life was born
With human fear the spaceman saw,
And changed from human form
His voyage led back to Nemo's world
A peaceful start of human form
He knew one day he'd leave again
To witness other planet's born
He watches helpless, tearful,
As the world embittered grows
Moving closer to the end of earth
The spaceman only knows
The spaceman only knows the truth
He's seen it from eternal youth
Man will always die.
