

I Need You

Ricky Nelson

Like an eagle soaring through the sky
I can see beyond the borders of our lives
No more fighting, no more taking sides
Now I'm standing here with both arms open wide
Talk to me and I won't be a stranger
Close your eyes, and we both feel the same

I Need You
Like the air I'm breathing
I Need You
You're a part of me inside
I'm with you
As long as my heart's beating
And together we'll survive

Stand beside me, we can work it out
I could use some help, and that's what love's about
Look through my eyes, past the setting sun
I could see a day when we can live as one
Take my hand; let nothing come between us
I will be here for you 'til the end

I Need You
Like the air I'm breathing
I Need You
You're a part of me inside
I'm with you
As long as my heart's beating
And together we'll survive

Hear me out; use your heart to listen
Different worlds can't keep us apart

I Need You
Like the air I'm breathing
I Need You
You're a part of me inside
I'm with you
As long as my heart's beating
And together we'll survive

I Need You
I'll be here when you need me
I'll hold you as dear to me as life (as dear to me as life)

I Need You
You've given love a new meaning
You're a part of me inside

I Need You
Like the air I'm breathing
I Need You,
You're a part of me inside
I'm with you
As long as my heart's beating
And together we'll survive
