

Let It Be You

Ricky Skaggs

If I could find a love to treasure with this heart and with the
se hands

I could build a strong foundation in a world of shifting sands

If I could show just what I've made up it'd be surprise what I
can do

But I need someone to help me, let it be you

'Cause I ain't to find somebody who really understands

The things that make a difference between a woman and a man

Yeah I bet all my best intentions will never see me through

If I don't find what I'm missin', let it be you

Let it be you who wakes me in the morning

Let it be you who lays down with me each night

Side by side we can dream together

Let it come true, let it be you

There are lessons in this life I can't learn all by myself

There's beauty I can only see through the eyes of someone else

There's a place I've always heard of only love can take me to

But I need someone beside me, let it be you

Let it be you who wakes me in the morning

Let it be you who lays down with me each night

Side by side we can dream together

Let it come true, let it be you, let it come true, let it be yo
