

The Sun Changes Everything

Right Said Fred

The sun changes everything
It feels good you're warm again
The sun changes everything
And we lap and we lap and we lap and we lap it up

My girlfriend looks so fine
She's got a cute suntan, glass of wine
And I wax my car a hundred times
Coz I love the way it looks in the sunshine

The sun changes everything
It feels good you're warm again
The sun changes everything
And we lap and we lap and we lap and we lap it up

The sun changes everyone
They've got a big smile a mile long
The sun changes everyone
And we lap and we lap and we lap and we lap it up

Friends come round to relax
We got UV rays on our backs
Coz there's no debate it's a fact
Life looks better
Lived in the sunshine

The sun changes everything
It feels good you're warm again
The sun changes everything
And we lap and we lap and we lap and we lap it up

The sun changes everyone
They've got a big smile a mile long
The sun changes everyone
And we lap and we lap and we lap and we lap it up

Here comes the sun
here we go
here we go
Here we go again
(WH)

My girlfriend looks so fine
She's got a cute suntan, glass of wine
She's in a bikini that's a crime
Coz I love the way she looks in the sunshine

The sun changes everything
It feels...

The sun changes everyone
They've got...

The sun changes everything
It feels...

The sun changes everyone

They've got...

The sun changes everything
The sun changes everything.
