

# Peace Dream

Ringo Starr

Last night I had a peace dream  
You know how real dreams can be  
The world was a better place  
For you and me can't you see?

No need for war no more  
Better things we're fighting for  
No more hunger no more pain  
I hope I have that dream again

Can you imagine, all of this coming true?  
It's really up to all of us to do  
Just like John Lennon said in Amsterdam  
Conk his bed

One day the world will wake up to see  
The reality

Last night I had a peace dream  
You know how real dreams can be  
The world was a better place  
For you and me, can't you see?

(You've got imagine)  
No need for war no more  
(Try to imagine)  
Better things we're fighting for  
No more hunger, no more pain  
I hope that dream comes true someday

So try to imagine if we give peace a chance  
All the world could be living in harmony  
One day our dream could be reality, reality

Last night I had a peace dream  
You know how real dreams can be  
The world was a better place  
For you and me

(You've got to imagine)  
No need for war no more  
(Try to imagine)  
Better things we're fighting for  
No more hunger, no more pain  
We'll make our dream come true someday
