

# Galactic Cleansing

## Rings Of Saturn

Kill every human on this Earth

We have been complacent for far too long, time is up  
Ancient man considered us their masters  
Refuse to comply you will meet your end

Humans can't fathom our animosity  
Jaw clasp to delicate limbs, blood fills the mouth  
The entrails of those harvested marks the dawn of a new galactic cleansing

We are the end of the organism, the embodiment of all torment  
We are what a black hole fears, an ancient adversary that's awoken

Warp the mind, deranged thoughts, erratic massacre begins  
An army genetically engineered with one goal in mind  
Lay waste to the filth the resides here, a genocidal epidemic  
Introduced, families fragmented before their very eyes

Colonize this barren surface begin anew
