Life Less Frightening

Rise Against

Suffering from something We're not sure of In a world There is no cure for These lives we live Test negative for happiness Flat line, no pulse, but eyes open Single file like soldiers on a mission If there's no war outside our heads Why are we losing? [Chorus: 2x] I don't ask for much (Life less) Truth be told I'd settle (frightening) For a life less frightening, (Life less) A life less frightening (frightening) Hang me out to dry I'm soaking With the sins of knowing What's gone wrong But doing nothing I still run Time again I have found myself stuttering Foundations pulled out from under me This breath is wasted on them all Will someone answer me [Chorus 2x] Is there a God tonight Up in the sky Or is it empty just like me? (Just like me) A place where we can hide Out from the night Where you are all I see (Where you are all I see) So blow a kiss goodbye then close your eyes Tell me what you see (Tell me what you see) A lifetime spent inside this dream of mine Where you are all I see

[Chorus 2x]
