

# Methadone

Rise Against

Love like a needle full of methadone  
Potent but not real, left you wanting more

Lipstick track marks bleeding wet  
Like Montagues and Capulets  
For us child the stars refuse to shine  
Oh why for us, child, do the stars refuse to shine?

Somewhere strung out on the lam  
We wound up back here again  
Like unstable chemicals  
Combining only to explode

What will it take for you to notice?  
I am a heart on fire, and all the world's a fuse  
So don't get close  
Trouble and the worth  
Am I better off on my own?

Contaminated, quarantined then left alone  
A shipment refused, address unknown  
A damaged goods they soon forget  
The choking dust that we got left  
For us all, the stars refuse to shine

Tap the vein and light the match  
We burn like stars before the crash  
But for you there's still a chance  
Just let go

What will it take for you to notice?  
I am a heart on fire, and all the world's a fuse  
So don't get close  
Trouble and the worth  
I'm better off on my own  
On my own

Now there's nowhere to run  
And yeah there's nowhere to hide  
There's nothing under the sun  
We haven't already tried

What will it take for you to notice?  
I am a hand grenade, pin already pulled so don't let go  
As we chase the sun my shadow slows us down  
And without me along, you're better off and I know  
You're better off and I know  
And I know
