

# The Great Die-Off

Rise Against

There's a fire on the borders and it's burning down the walls you built high  
And there's a steady stream of anger and it's spilling from the coasts  
A tidal wave

And the words say we reap what we sow  
So where I bury you I'll build home  
In line to reclaim but we're sick of the wait

We want it all and we want it now  
Tonight I watched your fires burn out  
The cold dead hands we pried these guns from are yours  
We want it all and we want it now  
A tide is coming to drown you out  
We make ourselves at home while your body's still warm

Tradition tethers us to rituals and all we are just clocks on wrong times  
And something triggers each and every time I hear you say  
"God bless this place"

But your numbers are dwindling now  
Though endangered we'll still hunt you down  
With heads on a stake long may you reign

We want it all and we want it now  
Tonight I watched your fires burn out  
The cold dead hands we pried these guns from are yours  
We want it all and we want it now  
A tide is coming to drown you out  
We make ourselves at home while your body's still warm

And there's a fire on the borders and it's burning down the walls you built high  
And there's a steady stream of anger and it's spilling from the coasts  
A tidal wave

We want the motherfucking world and we want it now  
Tonight I watched your fires burn out  
The cold dead hands we pried these guns from are yours

No I don't want to wait  
I know a better way  
So step aside, come on or better yet just go away  
Our chance has finally come  
There might not be another one now  
No we're not gonna wait  
We want it now  
Yeah we're dousing the flames  
We want it now
